

## Gucheng Multifunctional Primary School Complex - Reward Ceremony 2016

To remind: the primary school in Gucheng dates back to 1930. At the initiative of Mr. Wei Liu Cheng, a famous native of Gucheng – Party Secretary and Governor of Hainan and CC member --, the school was rebuilt in 1912-13 as a major multifunctional primary school complex offering primary and pre-school education for the wider area around Gucheng.

No surprise that more than 460 students attended the 1-6 grades and that more than 160 children enjoyed pre-school teaching in the first year of the new building complex. The number further increased since then, demonstrating the importance of the institution for the primary education for Gucheng and the surrounding areas.

On the occasion of the Children's Day 2016, 6 teachers and 12 students of the Gucheng Primary School were honored for their performance and dedication during the past school year with a credential certificate and RMB 3200 per person for each teacher and RMB 500 for each student.

Both, the Education Bureau of Biyang and Dr. Mark Qiu of the *Chongren Foundation* feel the annual honorary certificate and financial reward as a useful tool to motivate teachers and students to give their best in school and to the society.

A rich program of dances and entertainment demonstrated convincingly the solid skills and good discipline of the students at all levels. A special performance was made to pray for a long and healthy life of *Qiu yeye*, i.e. Dr. Mark Qiu of the *Chongren Foundation*.

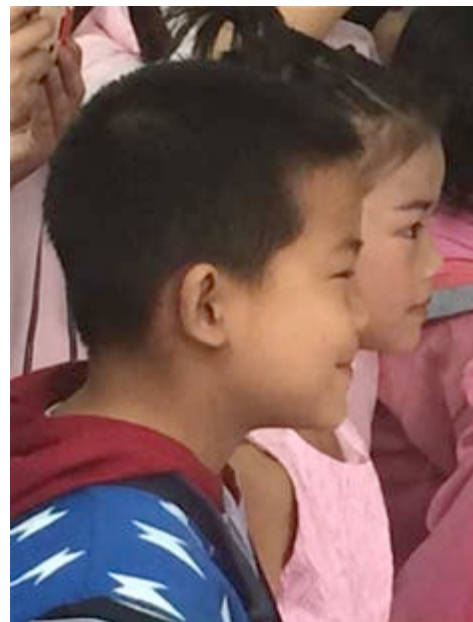

Happy faces all over to watch the performances !

Visibly fascinated by the numerous performances of their co-students

Expressing warmest thanks to the *Chongren Foundation*, represented by Mr. Wei Feiming, and to the great native of Gucheng who made the new school complex to happen, thus further improving the education opportunities for the whole area.

For the *Chongren Foundation*  
Erwin, June 2016
