

Gucheng Village, Biyang County, Henan New Central Primary School Project

- After due and comprehensive discussions, the Education Bureau of Biyang and Chongren agreed on a budget of RMB 2,834 million for the construction of one large U-shaped multi functional primary school project.
- The new school complex will be in line with the needs of today and in the near future of Gucheng and the four surrounding villages.
- The construction is expected to start in late Fall 2012 and to be finished in Spring 2013.

The sketch of the new 3-storey U-shaped school complex, agreed by Biyang Education Bureau and Chongren, after due discussion of the best allocation of capital.

The people of Gucheng are living mainly from agriculture. Though they are visibly happy, their income is rather modest.

None of the old buildings are in a quality and of safety standards that would allow to renovate them, and add a third floor.

Even the main classroom building, built in 2000, would not allow to be enlarged and to be added a third floor, because the walls have no vertical steel reinforcements.

Party Secretary Wei Liucheng and Mark Qiu are meeting happy villagers. Both are instrumental to ensure an efficient allocation of capital for the benefit of Gucheng.

For Chongren,
