

Gucheng Elementary School Update on the construction, March 2013

Chongren visited Gucheng on March 2-3, 2013, to perform the control of the structural works that were completed at the end of February.

Both, Song Maoxiang of the Swisstec office in Beijing and Erwin of Chongren, felt the structural works to be fully in line with the quality and safety standards of Henan and other provinces. No noticeable quality issues could be noticed.

An impressive, modern school U-shaped school complex that will offer space for more than 300 students, including around 100 boarding places.

The old school building, August 2012

Solid structural works,
as it can be seen from
all directions of the sky.

Installation works can start without delay, enabling the Education Bureau to use the classroom building as of early April 2013.

Views of and from the third floor

The Government of Biyang will fully finance the construction of a sports ground, adjacent to the classroom complex.

The authorities will, furthermore, finance the building of a new wall around the school complex, a new gate, and the equipment of the Gucheng school with all modern teaching, IT and sport materials.

Site of the new sport ground: 3 mu

Both, the local officials of Biyang district and the engineers of the construction company, were very helpful in answering all questions raised by Chongren during the control visit.
