## The IT-project at the Wangu Primary and Junior Middle School

The two rooms for IT instruction at the Wangu Integrated Primary and Junior Middle School are in the L-shaped classroom building

The Junior Middle School section of the IT instruction is at the second floor of the L-shaped classroom building

40 desk top computers and an integrated control/instruction center for the teacher

Photo made during the visit on November 4, 2010

The integrated multimedia system enables the teacher to control/ instruct the students individually or collectively, in both sections (primary and junior middle). An instructor, specialized in teaching young students in IT, has been employed by the Education Bureau, on a long term basis, to make best use of the modern equipment.

Dr. Mark Qiu, controlling the equipment and the records of the first week of instruction, was fully satisfied with the quality and the progress of the students.

The room for IT instruction of the Primary School section is on the 3rd floor, also with a total of 40 desktop computers.

The teacher can supervise and instruct the students of this section also by the multimedia system installed on the 2nd floor.
